Jim,

Is there a time I can take a look? What JCI is mentioning doesn't make sense to me.

Stephen

Hi Steve,

I had a guy from Johnson Controls look at our heating unit. There is not enough pressure to push condensate up 18 inches. It does not help to increase steam pressure because control valves will throttle it down. The solution is to not push condensate up 18 inches of pipe. Smallest amount is best. What can be done?
